- Rich categories
Furniture handle, door handle, smart lock, bathroom accessories, functional hardware

OVERSTAR Handle

The handle is installed on the door, window, drawer, cabinet and other furniture, push, pull, pull function, easy to switch by hand appliance.

- ★ The handle can not only play the role of saving manpower and facilitating home life, but also play a good decorative role when properly matched. Therefore, the purchase of handle should be well planned.

Handle purchase, first of all, you need to consider the handle with the size of doors and Windows, furniture cabinet doors, etc. If the door and window cabinet door is very small but with a large handle is very inappropriate, on the contrary, the door is very large, with a small handle is not convenient. The handle style should be matched with the overall home decoration style.

- ★ Iron is the most classic and widely used material in the handle industry. It offers incredible advantages: the raw material is highly affordable, exceptionally durable, and excellent for stamping and forging. It takes perfectly to surface treatments like baking paint and electroplating, which prevent rust and create beautiful, retro colors. Best of all, its solid, heavy weight feels incredibly substantial and sturdy in your hand. For rugged beauty and unbeatable practicality, iron is a fantastic, cost-effective choice!
